

Product information RA 701

stationary suction systems for wet/dry chips

- » suitable for the manual or automatic suction extraction of small to medium amounts of chips, coolant or dust
- » collection tank volume of 60 litres, automatic emptying into chip conveyors or troughs
- » optional bypass solution for alternate emptying and suction operation without switching the motor off

Suction system for simultaneous extraction from several suction points

For connection to several machining centres. Suitable for the suction extraction of medium amounts of chips with coolant; discontinuous discharge via flap mechanism. Variable installations for drive unit

RA 701

D4 x 5.5
(22kW)

Technical data for the series RA 701

Suction unit type	RA 701 D2x5,5	RA 701 D13	RA 701 D3x5,5
Output [kW]	11,0	13	16,5
Voltage [V]	400	400	400
Voltage [kPa]	26	26	26
Max. air flow rate [Nm ³ /h]	1.040	1.100	1.560
Sound level dB [A]	74	76	74
Dimensions [mm]*	depends on base frame		
Weight [kg]	450	450	586
Article number	990 0905	990 0983	990 0981

* Dimensions may vary
